CATÁLOGO 2

2021

**BRANSTOM**  
THE BRAND FOR BRANDS.

Dear business partners,

We are bringing you the new Catalogue 2021, packed with our quality products as always. You can find several interesting novelties, as we focused on innovating our range of promotional textile and workwear. You can look forward

to a number of new colours, cuts and safety features.

The key information of the past year is the change of the company's business name. After the successful rebranding of the clothes, we proceeded to change the name of the company itself to MALFINI, a.s. on 1 December 2020. We are completely changing the original name, which we have used since our foundation in 1999. We continue to be synonymous with quality, exemplified both in our products and services, and with our logo - the black silhouette of an eagle. Both our former name and the new one come from the same root - adler means eagle in German, while malfini means eagle in Creole. Thanks to this, we have the opportunity to transfer the slogan of product rebranding from 2018 „Brand changes, eagle stays“ to „Name changes, eagle stays“. And so we can fully spread our wings and focus on markets where our development has so far been hampered by legislative processes resulting from the ownership of trademarks by a competing company.

We prepared all of that in a very challenging year for all of us, as we face the effects of a worldwide pandemic together. We saw the power of nature, and gained respect for it – and the often lacking humility facing it. We knew given our connections and business relationships, we were almost obligated to help deal with the crisis, and quickly provided protective equipment for you as well as on the B2C market.

We believe, that the worst is behind us, as we adapted to the new situation. Our logistics center is full of goods, and the whole MALFINI team is ready to make your wishes happen.

Thank you for your loyalty. We look forward for the cooperation in the new year – and trust you do too!

#### QUALITY PRODUCT

The quality of our products is by now a staple of ours, being a big focus throughout our system, from manufacturing to shipping.

#### SALES TEAM AND THE E-SHOP

Our e-shop is always there for you, 24 hours a day, 365 days in a year, along with the support of our international sales team.

#### MARKETING SUPPORT

We are helping your business with our wide range of marketing tools. Every year, we do more and more, saving you time and money.

#### LOGISTICS CENTRE

The modern logistics centre in Ostrava is equipped with a photovoltaic system, helping us reach high energy self-sustainability of the building.

# MALFINI

a.s.

## It's important for us TO WORK AS ONE TEAM

We are always working hard to bringing you the solutions that best fit your needs. No matter the department, from creatives, the analysts, to the logistics worker, we complement each other and do our job sensibly and efficiently – from product development, to the the package waiting at your door.

#### PEOPLE

*We are not indifferent to the fates of the people around us, in the regions where we work, where we manufacture and live – including, of course, our employees and their families.*

#### PLANET

*We are considerate to the environment. Through our actions, we contribute to the preservation of our planet for our and your children and their descendants.*

#### PROFIT

*For you, we are becoming more and more transparent and helpful, as we continue to seek how to provide a better service to you than our competitors.*

# CSR

## The Social Responsibility

## We take care of **THE WORLD AROUND US**

*Corporate Social Responsibility [CSR] is the voluntary integration of not just economic, but also social and ecological aspects and impacts into our everyday work, above and beyond the legal obligation. We are aware of our responsibility to both natural and social environment we work in, and are proud to be responsible to our employees, nature and the public just like we are to our shareholders. People – Planet – Profit are inseparable corporate values for us.*

# QUALITY

## and certification

### OUR CERTIFICATIONS:

*Oeko-Tex Standard 100 is world-respected quality seal for textile products, made of only health-conscious materials.*

### CERTIFICATION OF OUR SUPPLIERS:

*BSCI is Business Social Compliance Initiative, which purpose is to secure that the market enter only products, that have been produced with respect to the basic working and ethic rights.*

### SUPIMA®

*The brand represents the finest cotton of 1% worldwide production. This type of the US grown Pima cotton has over a hundred years' history.*

### MERINO

*Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers.*

### ORGANIC

*Cotton produced from ecologically controlled agriculture and further processed under the strict inspection of all manufacturing processes.*

*GOTS-CU 1033786- it an acknowledged Global Organic Textile Standard International Working Group. Stipulates strict ecological and social rules for all phases of the production of organic textiles.*

*WRAP is an independent nonprofit corporation, which ensures legal humanitarian and ethical production all around the world and awards companies by relevant certificate.*

# BRANDS

Here, you can find  
**EXACTLY WHAT YOU NEED!**

*We, MALFINI, a.s., are one of the top suppliers of promotional textile in Czech Republic and Europe as a whole. Within our brands MALFINI®, MALFINI Premium®, Piccolio® and RIMECK®, you can find the product that best fits your needs.*

**MALFINI® 28**

*Look here for quality and easy branding. As the flagship collection, it contains the greatest variety of designs, colours and materials.*

**MALFINI Premium® 164**

*High-quality, exclusively designed collection, using only the best materials and refined colours. You will find T-shirts from superior SUPIMA® cotton and terry products from bamboo fiber here.*

**PICCOLIO® 152**

*Youthful brand using simple cuts and vibrant, cheerful colours. You can easily remove the label from these products and make them into a perfect medium for any brand name and message.*

**RIMECK® 198**

*Quality workwear clothing with trousers made of certified CORDURA® material, pre-shrunk cotton T-shirts, which can be washed at high temperatures, and High-Visibility products.*

## Additions FOR 2021

*What did we prepare for you in the new year? The summer staple, striped Sailor collection adds two new cuts, and jackets Valley to protect you from the wind in the colder months.*

*For information about stock availability please contact our sales department.*

**NO MORE LABEL!**  
*The label free collection t-shirts have only a small size tag and a maintenance label as required by law.*

**SILICONE FINISH**  
*All t-shirts are treated with silicone finish, so they are soft to the touch and have a silky shine. They keep their colour, shape and shine better even after being washed multiple times.*

**CUSTOMIZATION**  
*T-shirts are suitable for almost every kind of printing and embroidering. You can easily create your own brand of clothing for the whole family.*

# GOTS

Global Organic Textile Standard  
CU 1033786

*GOTS is recognized as the world's leading processing standard for textiles made from organic fibers. It defines high-level environmental criteria along the entire organic textiles supply chain and requires compliance with social criteria as well. The use of organic fibers from organic agriculture, the elimination of toxic substances and substances harmful to the environment and the introduction of a minimum wage, is only a small excerpt from the binding GOTS criteria. You can be sure that products marked with the GOTS logo are made with social and environmental responsibility.*

# MALFINI®

## Quality and comfort

*Products from the MALFINI® Collection excel in a variety of cuts, weights, materials and colours but they have one thing in common. You can rely on their quality and comfort. Whether for advertising purposes, sports or everyday wear, they will elegantly bear your print or embroidery.*

#### BRANDED TEXTILE

*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

#### 100 % COTTON

*100 % cotton is characterized by properties such as softness, pliability, strength, absorbency and breathability.*

#### SINGLE JERSEY

*Smooth elastic knitwear popular mainly in T-shirts and polo shirts.*

# T-SHIRTS

*First T-shirts were designed at the dawn of the 20th century, and quickly became a part of military uniforms and common for blue-collar workers because of their practicality. Branding T-shirts with print came later from Disney with their iconic Mickey Mouse T-shirts. Over time, more studios, companies and even rock bands joined in on the trend and in just a century, a piece of practical clothing became a space for self-expression and even art.*

Novelty. More information about stock availability will be provided by our sales department.

## ELASTANE

Fine and strong, yet elastic polyurethane fiber. The key feature is its high elasticity, as elastane can be stretched out from three up to seven times of its original length - without breaking. It is always used in combination with other fibers to ensure dimensional stability, increase elasticity and reduce the wrinkling of the final fabric.

\* Material composition may differ: 85 % cotton, 15 % viscose  
Novelty. More information about stock availability will be provided by our sales department.

#### BRANDED TEXTILE

*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

#### PIQUE

*Weft knitted fabric patterned with geometrical relief on the outside.*

#### RIB KNIT

*is elastic and mostly used for collars, cuffs, plackets and hems of poloshirts or sweatshirts.*

# POLO SHIRTS

*Soon after the first plain T-shirts, ones with collars came in early 20th century. Designed to replace the impractical white shirts as the standard for sports clothing, various version of these collared T-shirts enjoyed great success in sports like golf, tennis or polo, which gave them the name – polo shirts. Eventually, these became common even outside sports, becoming a fixture in every wardrobe, and a pillar of the “smart casual” style.*

# SHIRTS

Shirt is one of the oldest articles of clothing still around. While originally part of the undergarments, by the end of the 18th century it was common at social events, and during the last century, shirts entered the ladies' wardrobe as well. Modern designs combine various materials, from poplin and plain weave to patterned twill, with different cuts, all in order to reach perfect comfort.

*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

## POPLIN

*The favoured material for shirts production. It is extremely soft, pleasant to the touch, yet stiff enough.*

## CONSTRUCTION DETAILS

*Darts, folds or tucks shape the figure well and allow for plenty of movement.*

# CHIC<sup>207</sup>

**BRANDED TEXTILE**  
*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

**FRENCH TERRY**  
*Smooth weave with supplementary thread which increases strenght, absorption and the volume of the fabric.*

**RIB KNIT WITH ELASTANE**  
*Addition of elastane increases the elasticity and ensures the shape stability in rib knit.*

# SWEATSHIRTS

*In the 30's, sweatshirts were designed to deal with practical concerns of manual labourers working in colder weather. Originally simply thicker, long-sleeve T-shirts, they protected workers from the weather without limiting their movement or comfort. Sweatshirts enjoyed a boom starting in the 70's as a part and symbol of the hip-hop culture, a tool for the lower classes to express themselves.*

**BRANDED TEXTILE**  
*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

**FLEECE**  
*It has outstanding insulating attributes, long lifetime and is easy-care. Material can be treated with antipilling finish.*

**ANTIPILLING FINISH**  
*The antipilling finish lowers the pilling tendency of the fabric, keeping the product nice and smooth for longer.*

# FLEECE

*Half-way through the 20th century, first concerns with the sustainability of the textile industry came up – and with them, the invention of fibers from recycled plastics, like polyester, polyamide and elastane. They were quickly developed for many applications, and fleece was among those. Popular for sports and outdoor activities as an isolating, heating layer, fleece also gained recognition for use in standalone comfort clothing.*

## FROSTY 527

Gents Fleece

Fleece, 100 % polyester, antipilling finish

220 g/m<sup>2</sup> S - 4XL

RIMECK®

You can find more fleece products on page 205 in the RIMECK® section.

#### BRANDED TEXTILE

*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

#### SOFTSHELL

*Functional 3-layer fabric with membrane, making the fabric waterproof while preserving breathability.*

#### ACCESS FOR BRANDING

*Zip opening in product lining ensures easy access for the embroidery machine.*

# OUTDOOR

*Clothes meant for the outdoors need to have mechanical durability, wind and water resistance with good thermal isolation – while also being breathable. The breakthrough combining all of these is softshell material, introduced in the 70's. Thanks to its universal properties, it replaces layered clothing approach. Softshell is constructed to balance all requirements, and offers perfect protection against the weather.*

## NANOTEX® RESISTS SPILLS

Certified fabric which has been fundamentally transformed through nanotechnology. The resulting fabric repels liquids, thus extending the lifetime of the jacket and helping it retain the natural softness and breathability. When a liquid comes into contact with the fabric, rather than sinking into the fibers, the fluid beads roll right off the surface without leaving a mark.

PERFORMANCE 522

# ACTIVE

*Coats, shirts and uniforms used as sports clothes of the past century had strict rules for how, and from what, they were made. As sport became an integral part of the modern lifestyle, as an escape from the everpresent stress – a way to relax both body and mind – sports clothes changed. Comfortable, airy and functional are the new rules, leading to rising use of cutting-edge, quick-drying and breathable, fabrics.*

## BRANDED TEXTILE

*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

## 100 % POLYESTER

*Durable, quick-drying material that is overall very easy to take care of.*

## ELASTANE

*High stretch fiber, which is always used in combination with other materials. It ensures shape stability and reduces wrinkling of the final product.*

#### BRANDED TEXTILE

*These products are part of MALFINI® – brand of promotional textile. You can rely on their quality!*

#### BRUSHED TWILL

*The brushed twill finish makes the surface finer and gives it a matte appearance.*

#### PLAIN TWILL

*Smooth twill weft is easy-care and it has a slightly shiny look to it, catching the eye.*

# CAPS

*A trend that is with us for over 150 years, first head covers with a visor were a part of baseball uniforms, protecting the players from the sun glare. These caps, with the team logo, first spread among the fans, then quickly into the wardrobes of millions. Today, caps come in many shapes and sizes – straight or arched visor – but they are still trendy as ever.*

#### BRANDED TEXTILE

*These products are part of MALFINI® - brand of promotional textile. You can rely on their quality!*

#### TERRY

*A three-dimensional fabric with very soft touch and excellent at absorption.*

#### CLOTH

*Cloth or canvas fabric is made of strong, regularly repeating weave that looks the same on the front and the reverse.*

# TERRY & BAGS

*Accessories like these are daily necessities and are even serving as home décor. The towels as we know them today - with looped fabrics designed to absorb water while being also pleasant to the touch were preceded by light and straight fabrics. Similarly, bags also used to be plain and utilitarian while now, they come with designs, patterns and colours, becoming a fashion accessory and one of the most popular promotional items.*

# MERINO

Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers. The reason for these qualities is the size of an individual fiber – and merino wool fibers are very fine, thinner than 18 microns. As such, it is used in every area of fashion from haute couture robes to highly functional garments.

## CHARACTERISTICS

### BREATHABLE

Wool fibers can absorb a lot of moisture and lead it away from the body, and merino wool is even better at it.

### THERMO REGULATING

Unlike synthetic materials, merino fiber is active and reacts to changes in body temperature. It retains heat when the weather is cold, and cools the skin when it's hot.

### ODOR RESISTANT

Merino wool has antibacterial effects and absorbs sweat. Clothes from it stay nice and fresh much longer, even in rougher conditions.

### NATURALLY ELASTIC

Each fiber works like a small "spring", expanding and contracting back into shape. The fabric, as a result, doesn't wrinkle.

### PLEASANT TO WEAR

The fine, flexible fibers of merino wool make it very comfortable overall. It is soft to the touch, pleasant to wear even directly on skin, unlike most other types of wool.

This natural wool is sheered from the Merino breed of sheep, kept in natural environment (open field), with most of the production comes from Australia, New Zealand and Argentina. Because sheep don't stop growing wool, they need to be sheered every year. Not only is wool a renewable resource, it is also biologically degradable – after you throw it out, it will decompose and provide soil with nutrients.

### HOW TO TAKE CARE OF IT

You can use washing machine up to 40°C temperature, making maintenance easy. Of course, we recommend washing inside out and with similar colours. To preserve the shape, avoid drying in direct sunlight and heat, and iron using only steam at medium temperature. If your merino clothing catches a slight odor, just airing it properly should be enough to remove it.

## MERINO RISE 157

*T-shirt Gents*

*Single Jersey, 100 % merino wool*

*17,5 µm, machine wash*

**190 g/m², S - 3XL**

## EFFECT 530

fleece unisex

Fleece, 100 % polyester, antipilling finish;  
complementary material: plain weave, 100 % polyamide  
▲ 210 g/m², S - 3XL

highly insulating fabric  
shoulders and elbows covered by a waterproof, abrasion-resistant fabric  
inner neckline with a shell colour tape  
full-length molded zipper  
pockets with molded zipper  
sleeve hems with cuffs  
bottom hem adjustable by elastic drawstring  
antipilling finish on the both sides

## JACKET HI-Q 506

fleece unisex

Fleece, 100 % polyester, antipilling finish  
Complementary material: Rip Stop, 100 % polyamide, inner PU coating,  
▲ 360 g/m², S - 3XL

highly insulating fabric  
shoulders covered by a waterproof, abrasion-resistant fabric  
full-length molded zipper  
pockets with molded zipper  
bottom hem with elastic band  
sleeve hems adjustable by velcro  
antipilling finish on the outer side

### RIP STOP

Very strong, regularly repeating weave. In this smooth fabric, thick warp and weft threads are interwoven in intervals of 5 - 8 mm. The surface gets an effect of a grided structure. This apparent grid significantly increases the fabric's resistance to ripping and tearing.

New product.

# REDESIGNED CUT

## new ready-made sizes

*We introduce the new cut for Woody and Ranger line of workwear. The new slightly slimmer and longer design is more anatomically shaped to allow for any motion.*

*Woody and Ranger work clothes are carefully designed and put together. The technical details, manufacturing process and use of the best materials don't change at all. The new cut still offers a number of multifunctional pockets, reinforced sections and reflexive elements.*

### ORIGINAL CUT

*The same core design  
Classical, looser cut*

### NEW CUT

*Narrower, more anatomic cut  
Longer to better fit the height of the wearer  
Longer seam allowance so the pants can be individually lengthened  
The same core design*

 On stock: First quarter of the year 2021.

# ASSORTMENT

## GIFT BOX WITH COVER <sup>CT1</sup>

three-layer cardboard 1,01 E  
manufactured from recycled paper  
310 × 250 × 25 mm (min. 1 pcs)  
360 × 280 × 80 mm (min. 120 pcs)

## SHIRT ANCILLARY FOLDER <sup>P11</sup>

71 × 59 cm,  
size of folded shirt cca  
22 × 35-50 cm

## GIFT BOX WITH COVER <sup>CT4</sup>

three-layer cardboard 1,01 E  
manufactured from recycled paper  
310 × 250 × 25 mm (min. 1 pcs)  
360 × 280 × 80 mm (min. 120 pcs)

## PP/PE BAG WITH SELLO TAPE <sup>BAG/BGE</sup>

polyethylene (PE), thickness 0.04 mm  
/ polypropylen (PP), thickness 0.03 mm  
300 × 400 mm, 400 × 500 mm  
(min. 100 pcs)

## CARTON <sup>CT6</sup>

5-ply cardboard  
F1 = 395 × 295 × 135 mm (min. 80 pcs)  
F2 = 385 × 285 × 210 mm (min. 40 pcs)  
F3 = 385 × 285 × 290 mm (min. 40 pcs)  
F4 = 585 × 385 × 280 mm (min. 30 pcs)  
F5 = 585 × 385 × 330 mm (min. 30 pcs)  
F6 = 585 × 385 × 380 mm (min. 30 pcs)  
F7 = 585 × 385 × 430 mm (min. 30 pcs)  
F8 = 585 × 385 × 480 mm (min. 30 pcs)  
F9 = 585 × 385 × 530 mm (min. 20 pcs)

3-ply cardboard  
F0 = 305 × 215 × 120 mm (min. 80 pcs)

## ADHESIVE TAPE <sup>CT7</sup>

biaxially oriented polypropylene  
film (BOPP)  
width 75 mm,  
winding 60 mm  
(min. 1)

## SAMPLE Pack

*Custom mix of MALFINI® and MALFINI Premium® products with **25 % DISCOUNT**.*

### **How to order Sample Pack:**

*Minimum amount of selected products is 10 pcs (max. 1 pc of colour and size)*

*You can order your own Sample Pack up to 4 times per year under the conditions above.*

*Orders are possible only with help of our Sales Department (e-mail: **dev@malfini.com**)*

Marketing

# SUPPORT

## ONLINE support

*Linking our e-shop with yours.*

*More than 6000 product pictures in the highest quality.*

*Visualization of the product with your graphics.*

*Online catalogue for your customers.*

*The creation of your own newsletters and price offers.*

# PRINT

## & embroidery

### DIGITAL PRINTING

*An ideal technology for orders of a low quantity. A direct print is made on a state-of-the-art KORNIT® printer by using special water-based pigmented inks. The printing is of a photo quality and resolution and is guaranteed to be wash-resistant up to 40 °C. The textile can be ironed from the reverse side.*

### SUBLIMATION PRINTING

*Is suitable for textiles made of at least 65 % synthetic fibre. Disperse dye is printed on a sublimation paper underlay from which it is transferred to the textile in the form of vapour by using heat and pressure. The stability of colours is very good, imitations (significantly more expensive) of colourful woven goods are barely distinguishable from originals. In addition, the original material properties such as breathability and washability are preserved. This printing method is ideal for transferring photographs and is suitable for piece as well as serial production.*

### SILK-SCREEN PRINTING – DIRECT

*The oldest and so far the most effective textile printing technology. We use a machine which enables us to reach high daily production (up to 15 000 prints) while maintaining the same print quality from the first to the last print of the order. Thanks to this technology we are able to print practically any motif - from the simple and monochromatic to the photo-realistic one. The printing is guaranteed to be wash-resistant up to 40 °C. The printing can be ironed from the reverse side.*

### SILK-SCREEN PRINTING – TRANSFER

*Method where the design is first printed, using silk-screen, onto a transfer foil, fixed by glue and then transferred from the foil to the textile with heat and pressure. It's a very versatile method, usable on almost any textile, and is used mainly when direct silk-screen print is not possible. Only water repellent materials are unsuitable for this type of printing, and the printed clothes can be ironed from the other side.*

### LASER ENGRAVING

*The modern technology allows engraving on the textile by using a laser beam. It is unique and so far uncommon branding of fleece products. The final motif is burnt into the fabric (it's plastic) and so lasting forever. Since there is no paint or yarn application, the resulting graphic is unicolour - same colour as the textile.*

### EMBROIDERY/EMBROIDERED PATCHES

*This is a very high-quality way of presenting motives, logos or slogans on textile products. To be able to sew a certain motif onto a product we have to create an embroidery pattern for which we need to get a high-quality digitized model(.tif, .cdr, .pdf, .ai, .epg). Then your design is transferred into the sewing machine's program and is embroidered either directly on the product, or in the form of a patch sewn or glued on it.*

### PRESSING

*Suitable for 100% cotton products without buttons and zips that could be damaged by the pressure. This technology enables pressing of products into a shape chosen by you so you get an unusual gift or promotional item. You can select from our library of shapes or send us your own design.*

### GLITTERING STONES

*This special technology can be used for any design size and colour combination. The transparent or opaque stones are available in sizes from 1,5 to 8 mm. The minimum order for textiles with this application is 200 pieces. Products decorated this way have to be washed inside out at up to 40 °C.*

# MATERIALS

Fabrics and finishes

## NATURAL MATERIALS

### COTTON

*The most popular natural material in the fashion industry. Cotton is characterized by properties such as softness, pliability, strength, absorbency and breathability. It is pleasant to the touch and resists higher temperatures. It is often used in combination with synthetic materials or elastane.*

### ORGANIC COTTON

*Cotton produced from ecologically controlled agriculture and further processed under the strict inspection of all manufacturing processes. The biggest producers are Turkey, India, the USA and China.*

### BAMBOO FIBER

*Fiber made of bamboo based on regenerated cellulose. It has thermoregulatory, antibacterial, antimycotic and antistatic properties. Bamboo fiber is stronger along with three times higher absorbency than cotton, resistant to frequent washing and keeps its properties for a long time. We do not recommend using fabric softener in order not to reduce absorbency of the material.*

### MERINO WOOL

*Active fiber that regulates body temperature changes and is one of the most breathable natural fibers. The fiber can absorb large amounts of moisture – along with odour molecules in the sweat. Natural elasticity maintains dimensional stability, and the fabric is easy to maintain.*

### VISCOSE

*Fiber made based on regenerated cellulose. The input raw material for the production is wood or cotton pulp. Viscose is breathable and it has great absorption features. Compared to cotton, it is softer, shinier and finer.*

## SYNTHETIC MATERIALS

### ELASTANE

*Very fine, strong, elastic polyurethane fiber. The key feature is its high elasticity. Elastane can be stretched out from three up to seven times of its original length without breaking. It is always used in combination with other materials, ensures dimensional stability, increases elasticity and reduces material wrinkling. Elastane is prone to high temperatures.*

### POLYESTER

*Synthetic fiber made by modification of the input material. The fiber is very strong so it can be made thick or very fine (micro polyester). Material is durable, quick-drying and easy-care. It is suitable for sports and physical activities. Through chemical and mechanical processes various modifications of the material properties can be achieved depending on the purpose of use (insulation, impregnation).*

### POLYAMIDE

*The process of polyamide production is similar to the one of polyester. The material is durable, easy-care and has a good shape stability. It dries quickly thanks to low moisture absorption. It has twice the greater abrasion resistance than polyester. The fiber can be made thick or very fine as well as polyester. Mechanical and chemical treatment influences the final product's properties.*

### POLYPROPYLEN

*Smooth and hard surface fibres have high abrasion resistance. They show good hydrophobic properties which, due to very low water sorption, preserve the strength and dimensional stability of the material even in damp environments. The final material is lightweight and shows good thermal insulation.*

## BRANDED MATERIALS

### SUPIMA®

*The brand represents the finest cotton of 1% worldwide production. This type of the US grown Pima cotton has over a hundred years' history. Its unique extra-long fibers are twice the strength of regular cotton. They are resistant to pulling, breaking and tearing which makes products made of it incredibly smooth, resistant, non-pilling and keeping their appearance for a long time.*

**Nanotex® Resists Spills**

Certified fabric which has been fundamentally transformed through nanotechnology. The result fabric repels liquids, extends the lifetime, retains natural softness and breathability. When a liquid comes into contact with the fabric, rather than sinking into the fibers, the fluid beads roll right off the surface without leaving a mark.

**SOFTSHELL**

Softshell is a laminated textile for modern and sports plain weaveing and plain weaveing for outdoor activities. It is divided into membrane and nonmembrane. Plain weaveing made from this material is light, warm, elastic and has high mechanical resistance. Softshell with a membrane can be waterproof and simultaneously air permeable.

**CORDURA® CLASSIC**

The CORDURA® fabric is made in accordance with approved standards of the company INVISTA. CORDURA® holds of stains, resists tears and abrasions like no other fibers. Its strength ensures high longevity. CORDURA® is a registered trademark of INVISTA for durable fabrics.

**3M™ STRIPES**

3M retroreflective stripes increase visibility of the person who wears the garment, thereby reduce possibility of accidents. 3M™ technology of reflective materials is based on a layer of microscopic glass spheres mounted on the substrate fabric layer with a mirror surface. On 1 cm2 of the fabric there are up to 30,000 glass beads.

**SEGMENTED STRIPES**

Retroreflexive stripes are used to improve visibility during night and bad optical conditions. They are designed for use on safety clothes, with flexibility in mind, preserving full range of motion. These stripes are thermally applied, and can handle washing very well.

**FABRICS**

**SINGLE JERSEY SLUB**

Fine weft knitted fabric with characteristic structure of slub fabric. To achieve this final effect, a yarn with thicker and thinner sections is used throughout the length which are created by varying the tightness of the twist. This fabric is also characterized by its elasticity.

**SINGLE JERSEY**

Fine weft knitted fabric with characteristic dendritic columns on the outside and arches on the reverse side. The weave features ductility, softness and easy unstitching. The quality of the final product depends on the thread used for making the fabric. Products are manufactured from high quality ring spun thread.

**PIQUE**

Weft knitted fabric patterned with geometrical relief on outside. On the reverse side it is enhanced with supplementary thread. This type of knitting is popular for production of polo shirts and plain weaveing ideal for sports and leisure activities. The products made from it are breathable and easy to maintain.

**INTERLOCK PIQUE**

Warp knitted fabric with a pattern in which two fully interlocking rows alternate with a one-face row. One side of the knitted fabric has twilled separate stitches while the other side is plain. This type of knitting is popular for production of polo shirts and plain weaveing ideal for sports and leisure activities. The products made from it are breathable and easy to maintain.

**DOUBLE FACE**

Double face knitting also called double-sided. The wave is densely alternating front and back uprights on the outside and reverse material sides. In the unstretched position only front stitches are visible, reverse stitches are visible only while stretched. This knitted fabric looks identically from the back and it is highly elastic in the transverse direction.

**GRID KNIT**

Quick-drying, breathable knit for the production of modern, functional clothing. The special grid structure perfectly moves moisture away from the body and expands it onto the fabric surface for fast drying, making it feel fresh, dry but also cooling the body. High elasticity ensures maximum comfort during wear.

**RIB KNIT**

Double-sided knitted fabric consisting of rib pattern indicated by 11 or 22. This information determines the ratio of regularly alternating vertical stripes of stockinette stitch with vertical stripes of reverse stockinette stitch. Rib knit fabric is elastic and it is mostly used for collars, cuffs, plackets and hem of poloshirts and sweatshirts.

**FRENCH TERRY – not brushed**

Weft knitted fabric with characteristic dendritic columns on the outside and arches on the reverse side. The weave is enhanced with supplementary thread that leads along the reverse side of the fabric. The supplementary thread increases strenght, absorption as well as the volume of the fabric.

**FRENCH TERRY – brushed**

Weft knitted fabric with characteristic dendritic columns on the outside and brushed soft on the reverse side. Reverse side of the material enhanced with supplementary thread is fluffed by mechanical process. Such way treated surface has a larger volume and shows warmer properties.

**STRETCH FLEECE**

Smooth outside, brushed inside functional stretch knit fabric with great thermo isolating properties. It is soft, lightweight, breathable and quick-drying material. It is suitable for sports and physical activities. Inner part of the material has antipilling finish.

**FLEECE**

Weft knitted fabric characteristic with brushed dense teaseled soft surface on both sides of the material. It has outstanding insulating attributes, long lifetime and easy-care. Material can be treated with antipilling finish. Products are suitable for embroidery and laser engraving.

**PLAIN WEAVE**

Plain weave fabric is made of strong, regularly repeating weave that has the same appearance on the outside and reverse side. With its simple and dense interlacing, it creates a steady and smooth surface suitable for printing and embroidery. Plain weave fabrics are manufactured from high quality combed cotton or polyester.

**POPLIN**

Mostly used type of material for shirts production. It is extremely soft, pleasant to the touch, though stiff enough. It is made by a plain weave wave which has a higher amount of warp than weft threads.

**OXFORD**

Wave derived from canvas wave. The difference is that there are at least doubled yarns alternating when fabricating the fabric. Oxford is shinier than canvas. It has a wide range of use. It can be made from natural or synthetic yarns.

**RIP STOP**

Very strong regularly repeating wave. In this smoth fabric are interwoven thick warp and weft treads in the intervals of 5 - 8 mm. The surface gets an effect of a grided structure. This imaginary grid significantly increases the fabric rip and tear resistancy.

**TWILL**

Wave characteristic by diagonal spacing that is regularly repeated. It consists of alternating the system of warp and weft yarns. The fabric is very robust, tear-resistant and easy-care. The most common use of twill wave is in denim or workwear. The material is also popular for caps production. It can be smooth or brushed. The brush finishing makes the surface softer with matte appearance.

### TERRY

Loop fabric consists of solid loops on both sides of the material. It is a three-dimensional fabric with very soft touch and excellent absorbent properties. It is ideal for towels and bath towels production in the material composition of 100% cotton or blend of bamboo fiber and cotton.

### NONWOVEN FABRIC

Fabric produced without knitting or weaving. Input material is a polypropylene polymer melt. The result is a smooth, flat, porous fabric with a relatively high tensile strength and low abrasion and bending strength. The material is popular in the industry due to low acquisition costs and good filtration and insulation properties.

## FINISHES

### PRESHRUNK COTTON

During the production process of cotton products the space between the fiber gets reduced which eliminates the risk of shrinkage of the fabric during the washing and drying cycle. This process allows the final product to be washed at high temperatures for the purpose of removing any impurities and bacteria.

### MERCERIZED COTTON

The process of mercerization consists of immersing the cotton yarn into a bath for the purpose of changing their sections and leveling uneven fibers. The fiber cross-section thus obtains an almost perfect shape. The final material becomes smoother shinier and softer. Mercerization results in higher strength and better color stability of the material.

### SILICONE FINISH

The silicone finish is similar to the effect of fabric softner, however longer lasting. It makes the product soft to the touch, more dirt-proof and the prints stick much better.

### ANTIPELLING FINISH

Antipilling finish minimizes the release of fibers and prevents fabric's pilling. This process results in fibres fixation and stabilization. It reduces damaging of the upper part under excessive use and friction and extends the product lifetime and functionality.

### PU FINISH

A long-lasting polyurethane layer that is applied from one side of the base fabric. It provides water, moisture resistance, abrasion and dirt resistance. Due to the special composition, the layer is very flexible, lightweight and does not negatively affect the other properties of the product.

### PA FINISH

Acrylic treatment is used to improve the mechanical and practical properties of the fabric. It is mainly used in outdoor clothing and is characterized by wind resistance and tensile strength.

### TPU LAMINACE

Durable top layer made of thermoplastic polyurethane ensures stability of material properties in a wider range of conditions. The combination of the TPU membrane and the top material maintains the flexibility of the product and provides waterproof and abrasion resistant surface with excellent bend and tensile strength.

### SILVER COATING

A special matte silver coating applied from the inside of the fabric improves the functional properties of the material. It increases water resistance, prevents transparency of the top material and increases resistance to damage potentially caused by washing.

## CONCEPTS

- FAMILY
- FAMILY CONCEPT**  
Product available in gents, ladies and kids style.
- DUO
- DUO CONCEPT**  
Product available in gents and ladies style.

## NOVELTIES

- NEW PRODUCT
- NEW PRODUCT**  
For information about stock availability please contact our sales department.
- NEW COLOUR
- NEW COLOUR**  
For information about stock availability please contact our sales department.
- NEW CUT
- NEW CUT**  
For information about stock availability please contact our sales department.

## MATERIALS

- ELASTANE
- ELASTANE**  
A synthetic fiber that contains polyurethane bonds of high elasticity.
- ORGANIC
- ORGANIC**  
Cotton produced from ecologically controlled agriculture and further processed under the strict inspection of all manufacturing processes.
- MERINO
- MERINO**  
Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers.
- SOFTSHELL
- THREE-LAYERD SOFTSHELL**  
Three-layerd softshell with membrane
- SOFTSHELL
- DOUBLE-LAYERD SOFTSHELL**  
Double-layerd softshell

## MATEIAL PROPERTIES

- WINDPROOF
- WINDPROOF**  
Windproof material prevents wind and chills from penetration.
- WATERPROOF
- WATERPROOF**  
Rating in milimetres to indicate material's resistance to water pressure. The higher the water column is, the longer the fabric will remain waterproof.
- EXTRA DRY
- EXTRA DRY**  
Extra dry material.
- BREATHABLE
- BREATHABLE**  
Rating in g/m² per 24hours. The ability of a fabric to allow moisture vapor in grams in square meter per day. The higher the value is, the better fabric breathes.
- COOL
- WARM
- COOL/WARM**  
Soft, easy care, quick-drying and conductive fabric.
- THERMOREGULATION
- THERMOREGULATION**  
Keeps you warm when it's cold and reversed.
- ODOR RESISTANT
- ODOR RESISTANCE**  
Thanks to moist absorption it keeps sweat out of your skin and therefore it's antibacterial. The clothing stays fresh longer.

## MATERIAL FINISHES

- SILICONE
- SILICONE FINISH**  
The silicone finish is similar to the effect of fabric softner, however more lasting. It makes the product soft to the touch, more dirt-proof and the prints hold much better.
- ANTIPILLING
- ANTIPILLING FINISH**  
The antipilling finish lowers the pilling tendency of the fabric.

## TYPES OF LABELS

- TEAR OFF
- TEAR OFF**  
Tear off label.
- STICKER
- STICKER LABEL**  
Label in a form of a sticker. Can be easily taken off.
- LABEL FREE
- LABEL FREE**  
The products have only a small size label behind the neck for easy rebranding

## MULTIFUNCTION PRODUCTS

- 3 IN 1
- 3 IN 1**  
Multi use jacket can be worn as one whole winter jacket, or separately as a windbreaker and a fleece
- 4 IN 1
- 4 IN 1**  
Multi use Hi-Vis workwear jacket can be worn as one whole, upper and inner part separately, or just the upper jacket without sleeves as a vest

RIMECK®

**Selected garments from the collection HIGH-VISIBILITY (HV) RIMECK® correspond to the international standards, which determine the optimal form of protective Plaining with high visibility. Certified garments from the HV collection are supplied with a leaflet providing information on proper storage, treatment and purpose.**

**EN ISO 20471:2013** – High visibility Plaining – this international standard specifies requirements for Plaining with high visibility, which is able to visually indicate the presence of a user for vehicles or other mechanized means of transport under any light conditions, both in daylight and when illuminated by headlights of vehicles at night.

**EN 1150:1999** – Protective Plaining – caution Plaining with high visibility for non-professional use – standard specifies requirements for optical properties of caution high visibility Plaining suitable for adults or teenagers, not for professionals. The garments are designed for visual indication of the presence of users in all light conditions, both in daylight in urban lighting and when illuminated by headlights of vehicles at night.

**EN 343:2003+A1:2007** – Protective clothes – Rain protection - European standard determining the properties of fabrics and seams of a protective garment. The characteristics of these are measured for the outside of the clothes. After achieving the specific permeability requirments and reaching the appropriate certification, it provides protection against water penetration and resistance against steam penetration for the wearer.

**EN ISO 13688:2013** – Protective Plaining - this international standard specifies the general requirements for the implementation of protective workwear in terms of ergonomics, safety, size designation, aging, marking of protective Plaining and the information which is supplied by the protective Plaining manufacturer.

**High visibility Plaining are made of fluorescent material, and in combination with reflective stripes are divided into three categories:**

- **Category 3** – the highest level of protection – the minimum required substrate surface is 0.80 m² and 0.20 m² of retrorreflective material.
- **Category 2** – the medium level of protection – the minimum required substrate surface is 0.50 m² and 0.13 m² of retrorreflective material.
- **Category 1** – the minimum level of protection – the minimum required substrate surface 0.14 m² and 0.10 m² of retrorreflective material.
